Subject Index—Volume 13

A

Alveolar macrophages, viability and lysozyme release in rabbits, effects of tantalum oxide, silica, and latex on, 514
Angiography
  cerebral, computer-aided technique for overlaying, onto computed tomograms, 362
  cerebral, radiologic evaluation of cerebrovascular disease in experimental atherosclerosis in a subhuman primate model, 430
  hepatic artery embolization in the rabbit, angiographic, microangiographic and hemodynamic evaluation of, 306
  in non-occlusive ischemic colitis in a canine model, aspects of, 506
  renal canine, a comparison of the hemodynamic responses to metrizamide and meglumine/sodium diatrizoate in, 74
  transient increases in canine arterial pressure and flow during angiographic injections, a proposed mechanism for, 195
Antiobiotics, observation on the metabolism of iopanoyl (Telepaque®) glucuronide in dogs treated with, 241
Arrhythmias, ECG changes induced by ionic and non-ionic contrast media during coronary arteriography in dogs, 233
  arrhythmogenic and cardiodepressive effects of contrast media on isolated rat atria, 444
Arteries
  arterial calcification, correlation of radiographic and histologic findings in, 110
  arterial flow, and pressure in dogs, proposed mechanism for transient increases in, during angiographic injections, 195
Arteriography
  coronary, ECG changes induced by ionic and non-ionic contrast media during, in dogs, 233
  coronary, toxicity of contrast media in: a review, 450
  coronary, direct and reflex myocardial effects of intracoronary administered contrast materials in the anesthetized and conscious dog: comparison of standard and newer contrast materials, 205
  mesenteric, in dogs, a simple method to measure arteriovenous shunt flow during, 191
Arthography, epinephrine enhanced, of the knee in dogs, 286
Aspiration biopsy, fine needle, safety of, in examination for pancreatic carcinoma in a porcine model (brief note), 547
Aspirin, effect of, on canine iopanoate transport maximum (brief note), 541
Association of University
  Radiologists, Proceedings of Annual Meeting 1978, 361
Atherosclerosis
  arterial calcification in, correlation of radiographic and histologic findings, 110
  experimental cerebral, in a subhuman primate model, radiologic evaluation of cerebrovascular disease in, 430
Autologous clot, and gelfoam embolization: effect on coagulation, 115

B

Barium enema, magnified double contrast technique for study of colonic tumors in the rat, 34
Bile ducts and liver, diagnostic imaging of (progress in clinical radiology), 265
Biliary tract, biliary excretion of iodipamide and iodoxamate in normal and common bile duct-obstructed dogs, 255
Blood Flow
  coronary, use of videodensitrometric methods of measuring, 46
  coronary, validation of regional myocardial flow measurements with scintillation camera detection of xenon-133 in dogs, 132
  hepatic, measurement of, and possible effects of hepatic arterial injection of contrast medium, blood, and saline on, 528
Bowel infarction, radionuclide imaging of, complicating small bowel intussusception in dogs, 127
Breast phantom, method for evaluating mammography technique, 291
Bronchography, alveolar macrophage viability and lysozyme release, effects of tantalum oxide, silica and latex on, 514

C

Cardiac arrest, effect of combined dextran and Streptokinase on cerebral function after: an experimental study on the dog, 490
Cardiac glycosides and sodium diatrizoate, deleterious synergism of, 340
Cardiac pressures, noninvasive measurement of, by induced ventricular wall resonance: preliminary results in the dog, 499
Cell turnover, increased collateral arterial and venous endothelial, after renal artery stenosis in the dog, 143
Chest lesions, measured conspicuity of, some effects of method on, 439
Cholangiography, comparison of iodipamide and iodoxamate in normal and common bile duct-obstructed dogs, 255
Cholescintigraphy, a study of o-cresolphthalexon and its analogs as cholescintigraphic ^{111}In carriers, 356
Clinical training, postgraduate (letter to the editor), 553
Colitis, non-occlusive ischemic: angiographic aspects of, in a canine model, 506
Collateral formation, in the dog, by extracorporal circulation after ligation of the superficial femoral artery (letter to the editor), 472
Collecting ducts in the perfusion fixed rabbit kidney, microradiography of: suggestions for the anatomic basis for the radiographic appearance of cortical striations and intrarenal reflux, 318
Colon
  colon carcinoma, radiologic evaluation of, in the rat, 34
  non-occlusive ischemic colitis of the colon: angiographic aspects in a canine model, 506
Complement activation, effect of endotoxemia on contrast media reactions in rabbits, 21
Computer analysis of pulmonary infiltration, 298
Computerized tomography
  computer-aided technique for overlaying cerebral angiograms onto computed tomograms, 362
  in detection of pulmonary nodules (letter to the editor), 470
  in detection, quantitation and contrast enhancement of myocardial infarction in dogs: comparison with histochemical staining and ^{99m}Tc-pyrophosphate imaging, 103
  of the knee, 57
  preliminary results of clinical application of Compton and photoelectric reconstruction in, 217
Congress of Nuclear Medicine and Biology, Second International (letter to the editor), 471
Conspicuity of chest lesions, some effects of method on the measurement of, 439
Contrast enhancement
  pharmacokinetics diagnostic potential of, 533
  time-related, of blood, normal muscle, and V2 carcinoma in the rabbit as determined by CT scanning, 334
Contrast media
  arrhythmogenic and cardiodepressive effects of, on isolated rat atria, 444
  biliary, saturation kinetics of iocetamic acid: evaluation of indirect pharmacokinetic techniques and comparison with iopanoic acid, 85
  deleterious synergism of sodium diatrizoate and a cardiac glycoside in mice, 340
  diagnostic potential of contrast enhancement pharmacokinetics, 533

effect of hepatic arterial injection of contrast medium, blood, and saline on hepatic artery flow, 528
effect of, on the isolated perfused canine heart, 519
histologic effects of Amipaque (metrizamide) and various, on mouse peritoneum, 161
intracoronary administered, direct and reflex myocardial effects of, in the anesthetized and conscious dog: comparison of standard and newer contrast materials, 205
ionic and non-ionic, ECG changes and arrhythmias induced by, during coronary arteriography in dogs, 233
iopanoate glucuronide: procedure for its isolation and purification and pharmacokinetics of its biliary excretion, 347
non-ionic (Amipaque), assessment of, in the gastrointestinal tract, 523
o-cresophthalexon and its analogs as cholescintigraphic ^{111}In carriers: a study, 356
osmotic effect and solubility of Amipaque (metrizamide) in the gastrointestinal tract, 93
reduction in ventricular fibrillation using calcium-enriched Renografin 76, 238
toxicity in coronary arteriography: a review, 450
uptake of, by experimental acute myocardial infarctions in the dog: a preliminary report, 337
urographic excretion studies: preliminary results with a six-iodine, singly-ionizing sodium salt—P.286, 325
CT scanning
diagnostic potential of contrast enhancement pharmacokinetics, 533
time-related contrast enhancement of blood, normal muscle, and V2 carcinoma in the rabbit as determined by, 334

D

Dextran combined with Streptokinase, effect of, on cerebral function and blood flow after cardiac arrest: an experimental study on the dog, 490
Diagnostic accuracy, some effects of method on the measured conspicuity of chest lesions, 439
Diagnostic radiology, residents, postgraduate clinical training for (guest editorial), 469
Diatrizoate, comparison of hemodynamic responses to metrizamide and meglumine/sodium diatrizoate in canine renal angiography, 74
Disc abnormalities, intervertebral, associated with vetebral metastasis: observations in patients and cadavers with protastic cancer, 182

E

Echography, of simulated pleural effusions, qualitative distortion at fluid-air interfaces during, 436
Embolization
therapeutic, control of experimental traumatic hepatic hemorrhage in dogs, by transcatheter embolization, 71
transcatheter, with microfibrillar collagen in swine, 200
Endotoxin
contaminating, possible role of, in radiographic contrast media reactions (letter to the editor), 554
effect of endotoxemia on contrast media reactions in rabbits, 21
Epinephrine enhanced knee arthography in dogs, 286
Eye movements, study of error rates, scanning patterns and dwell times in pulmonary nodule detection, 175

F

Fluid-air interfaces, qualitative distortion at, during echography of simulated pleural effusions, 436

G

Gallbladder
imaging of, review of problems involved with oral cholecystography, indications, interpretation, accuracy of ultrasonography (progress in clinical radiology), 471
imaging, present status of (progress in clinical radiology), 471
Gamma-camera
high purity germanium, imaging characteristics of, 223
imaging in detection and localization of ^{99m}Tc-labeled immune splenocytes at tumor site in mice, 121
Gastrointestinal tract, assessment of nonionic contrast medium (Amipaque) in, 523
Genetic damage, from diagnostic radiation (critical review), 100
Germanium camera, small, imaging characteristics of, 223

H

Heart
cardiac arrest, effect of combined dextran and Streptokinase on cerebral function after: an experimental study on the dog, 490
cardiac glycosides, and sodium diatrizoate in mice, deleterious synergism of, 340
cardiac pressures, noninvasive measurement of, by induced ventricular wall resonance: preliminary results in the dog, 499
perfused isolated canine, effect of contrast media on, 519
Heavy-iron radiography
density resolution and specimen radiography, 163
for detection of low contrast rumors: density resolution and specimen radiography, 163
Hepatic artery
embolization, angiographic, microangiographic and hemodynamic evaluation of, in the rabbit, 306
flow, effect of hepatic arterial injection of contrast medium, blood, and saline on, 528
Hepatic hemorrhage, experimental traumatic in dogs, control of, by transcatherter embolization, 71
Hepatoma model, in the rat for use in comparing isotope biodistributions, 40
Hydrogen distribution in animals, nuclear magnetic resonance for obtaining tomographic images of, 63

I

Image quality, as determined by comparison of modern radiographic screen-film systems, 460
Intestinal ischemia, thermographic assessment of intestinal viability following ischemic damage in dogs, 16
Intravascular coagulation, gelfoam, and autologous clot embolization: effect on, 115
Intussusception, glucagon-aided reduction of (critical review), 551
Intussusception of the small bowel in dogs, radionuclide imaging of bowel infarction complicating, 127
Iodipamide, effect of iopanoate on biliary and urinary excretion of, in dogs, 79
Iopanoate, canine transport maximum of, and effect of aspirin on (brief note), 541
Iopanoate glucuronide, procedure for its isolation and purification and pharmacokinetics of its biliary excretion, 347
Iopanoic acid
effects of, on biliary and urinary excretion of iodipamide in dogs, 79
observation on the metabolism of iopanoyl (Telepaque®) glucuronide in dogs treated with antibiotics, 241
Ioxaglic Acid, (AG 62-27), nephrotoxicity of, in humans (letter to the editor), 554
Isotope distribution, comparison of ^{67}Ga with ^{137}Cs, ^{201}Tl, ^{203}Hg, ^{203}Pb and ^{57}Co in a rat hepatoma model, 40

K

Kidney
canine, increased collateral arterial and venous endothelial cell turnover after renal artery stenosis, 143
canine, post-cholecystography in hydrated and dehydrated dogs, and possible involvement of sodium iopanoate, 127
rat, experimental acute renal failure in the, failure of prostaglandin A_1 to modify renal diatrizoate uptake in, 150
ultrasonic detection of nonopaque renal calculi (critical review), 550
Knee arthography, computer-assisted tomography of the knee, 57

L

Left ventricular asynergy, comparison real-time, two-dimensional echocardiography and cineangiography in detection of (critical review), 171
Liver
and bile ducts, diagnostic imaging of (progress in clinical radiology), 265
hepatic artery embolization, angiographic, microangiographic and hemodynamic responses of, in the rabbit, 306
hepatic artery flow, effect of hepatic arterial injection of contrast media, blood, and saline on, 528
hepatic hemorrhage, experimental traumatic, control of, by transcatheter embolization, 71
hepatoma model in the rat for use in comparing isotope biodistributions, 40
Low contrast tumors, imaging of, by heavy-ion radiography, 163
Lung lesions, simulated, perceptions of, 12
Lymphatics, visualization of, during canine renal transplant rejection, 328
Lymphography, transabdominal, after intraperitoneal injection of Rous virus in newborn rats, 28
Lymphomas
Hodgkins and non-Hodgkin's, comparison of, unique radiographic features of, 2
intrathoracic, clinical, pathologic and radiographic spectrum of, 2

M

Mammography technique, evaluated through a breast phantom method, 291
Mesentery arteries, comparison of the effect of vasopressin infusions on, in different species, 138
Mesenteric AV shunt, in dogs, a simple method to measure flow of, during arteriography, 191
Metrizamide
and meglumine/sodium diatrizoate, comparison of responses to, in canine renal angiography, 74
as tolerated by the myocardium, comparison with ionic contrast media, 444
histologic effects of Amipaque (metrizamide) and various contrast media on mouse peritoneum, 161
optic nerve sheath imaging with, 544
osmotic effect and solubility of Amipaque in the gastrointestinal tract, 93
Microangiography
hepatic artery embolization in the rabbit, angiographic, microangiographic and hemodynamic evaluation of, 306
lymphatic visualization during canine renal transplant rejection, 328
Microfibrillar collagen, transcatheter embolization with, in swine, 200
Microradiography of the collecting ducts in the perfusion on fixed rabbit kidney: suggestions for the anatomic basis for the radiographic appearance of cortical striations and intrarenal reflux, 318
Microspheres, 8–10 μm, 15 μm and 25 μm, diameter of arterial microvessels trapping, as determined by vital microscopy of the hamster cheek pouch, 313
Microvessels, arterial, diameter of, trapping 8–10 μm, 15 μm and 25 μm microspheres as determined by vital microscopy of the hamster cheek pouch, 313
Myocardial infarction
acute experimental, in the dog, uptake of contrast materials by: a preliminary report, 337
in dogs, detection, quantitation and contrast enhancement of, utilizing comuterized axial tomography: comparison with histochemical staining and ^{99m}Tc-pyrophosphate imaging, 103
Myocardial ischemia, direct and reflex myocardial effects of intracoronary administered contrast materials in the anesthetized and conscious dog: comparison of newer and standard materials, 205

N

Nuclear magnetic resonance, tomographic imaging with, 63

O

o-Cresophthalexon, and its analogs as cholescintigraphic ^{111}In carriers, 356
Optic nerve sheath, imaging of, with metrizamide (brief note), 550

P

Pancreatic carcinoma, safety of percutaneous fine-needle biopsy in examination for: study in a porcine model (brief note), 547
Pediatric tracheostomy: III appraisal of xerography, 279
Percutaneous biopsy, fine-needle pancreatic, safety of: a porcine model (brief note), 547
Pleural effusions, simulated, qualitative distortion at fluid-air interfaces during echography of, 436
Portal vein, catheterization of, in percutaneous transhepatic portography, in the dog, 26
Portography, percutaneous transhepatic, in the dog, 26
Proceedings of the Association of University Radiologists Annual Meeting 1978, 361
Prostaglandin A_1, failure of, to modify renal diatrizoate uptake in experimental acute renal failure in the rat, 150
Pulmonary infiltration, computer analysis of, 298
Pulmonary nodules, visual scanning, pattern recognition and decision-making in detection of, 175

R

Reactive hyperemia as characteristic of revascularized viable ischemic tissue, 16
Renal artery stenosis, in the dog, increased collateral arterial and venous endothelial cell turnover after, 143
Renal calculi, nonopaque, ultrasonic detection of (critical review), 550
Renal failure
experimental acute in the rat, failure of prostaglandin A_1 to modify renal diatrizoate uptake in, 150
post-cholecystography in hydrated and dehydrated dogs, and possible involvement of sodium iopanoate, 247
Rous virus, lymphography after intraperitoneal injection of, in newborn rats, 28

S

Saturation kinetics of iocetamic acid: evaluation of indirect pharmacokinetic techniques and comparison with iopanoic acid, 85
of iopanoate, in dogs, and effect of aspirin on (brief note), 541
Screen-film systems, modern radiographic, physical characteristics of, 460

Sodium iopanoate
effects of, with iopanoic acid, on biliary and urinary excretion of iodipamide ir dogs, 79
nephrotoxicity of, in hydrated and dehydrated dogs, 247
Spleen
hemodynamic and morphologic evaluation of, after splenic vein ligation in the dog, 155
splenic trauma, hemorrhagic, in dogs, selective arterial infusion of vasoconstrictors for control of , 67
splenic vein ligation in the dog, hemodynamic and morphologic evaluation of the spleen after, 155
Splenocytes, ^{99m}Tc-labeled immune, in mice, localization, at tumor sites and detection by, of gamma camera imaging, 121
Star pattern images, interpretation of (letter to the editor), 173
Stenosis of the renal artery in the dog, increased collateral arterial and venous endothelial cell turnover after, 143

T

Tantalum oxide, silica and latex: effects on alveolar macrophage viability and lysozyme release in rabbits, 514
Thermography, use of, in assessing intestinal viability following ischemic damage, 16
Training, clinical postgraduate, for diagnostic radiology residents (guest editorial), 469

U

Ultrasonography
gallbladder imaging with indications, interpretation and accuracy with (progress in clinical radiology), 471
in detecting nonopaque renal calculi (critical review), 550
Urography
intravenous, patients receiving cardiac glycosides have higher risk of serious reactions to contrast media (sodium diatrizoate), 340
preliminary results of comparative studies with a six-iodine, singly-ionizing sodium sodium salt—P.286, 325

V

Vasoconstrictor infusion, selective arterial in dogs, for control of traumatic splenic hemorrhage, 67
Vasopressin infusions, comparison of the effect of, on the mesenteric arteries of different species, 138
Ventricles
ventricular fibrillation, reduction in, using calcium-enriched Renografin 76, 238
ventricular wall resonance, for induced, noninvasive measurement of cardiac pressure: preliminary studies in the dog, 499
Vertebral metastasis, intervertebral disc abnormalities associated with: observations in patients and cadavers with prostatic cancer, 182
Videodensitometry, digital cine-, for measuring angiographic velocity distribtution and blood flow, 46

X

Xenon-133
scintillation camera detection of, for validation of regional myocardial measurements in dogs, 132
Xeromammography, single-view negative-mode: an approach to reduce radiation exposure in breast cancer screening (critical review), 98
Xerography, in imaging of the airway in pediatric tracheostomy, 279
